

Software Engineer (Zürich)

As a Software Engineer you have the opportunity to work on all of our software stack and learn about state-of-the art web and mobile development with Alex our magician who was trained at Google and Disney in the US. You will be working with our tech stack consisting of MongoDB, Express, React, and NodeJS (MERN) and written in Javascript ES6.

Your responsibilities

- Translate requirements, designs and wireframes into inspiring user experiences
- Build and maintain high-performance, reusable and reliable code
- Work closely with other passionate software engineers to develop and ship new features
- Expand and enhance our CI/CD pipeline for smooth and safe production releases via automated testing and verification

What you bring

- Coding experience in server-side programming languages (e.g. Go, Python, Java, Ruby) as well as NO-SQL database handling
- Experience working with server-side MVC frameworks (e.g. Express)
- Coding experience in front-end programming Javascript Frameworks (e.g. React, Redux Ember, Angular, Meteor)

About Leva

Leva is a Fintech company with offices in Bern and Zürich, reinventing the way companies raise funds. We are building the backbone of the fundraising industry, because we want to reduce fundraising costs by 90% through automation and building amazing products.

We are looking for bright and courageous minds, who can push the boundaries and solve hard problems to satisfy our customers.

Do you have what it takes to improve a product 10x?

Join us! Send us your CV or drop by our office for a coffee and a hack session.
