Intern (Autumn 2020)

Development · Zürich, Switzerland

Are you working towards a degree in the field of information technology or electrical engineering with a focus in IT at ETH, a university or school of higher education? Do you speak English fluently and are you interested in finding out what it would be like to work as an engineer for Open Systems? If so, you have come to the right place.

Open Systems can offer you a variety of captivating challenges in the dynamic and global field of IT security. You will be working in an environment where innovative solutions, rapid development times, creativity and open communication are practiced and continuously fostered. The pursuit of technical advancement is at the center of our attention. In addition, we create an open, young and inclusive environment with exciting activities and events.

As an intern you will have the opportunity to work at our headquarters in Zurich full time for 6 months and will be appointed to a team in our Labs division that corresponds with your interests and accomplishments. Furthermore, you will take part in various projects with potential global impact during your time with us. An experienced Security Engineer with networking expertise who develops global security network solutions will supervise you and ensure you are well integrated in your team.

Open Systems is especially interested in employing IT graduates in permanent positions who have successfully completed an internship.

We look forward to receiving your complete online application. Please merge your application documents (CV, cover letter, etc.) to a maximum of two PDF files. For further questions and inquiries about applications, please feel free to contact Helena Grimm at +41 58 100 10 10.
