

# Internship GUI Development

**f/m, 100%, Zürich**

Swiss Post Solutions (SPS) is a leading outsourcing provider for business processes solutions and innovative services in document management. A strong international client base relies on SPS' ability to envision, design and build end-to-end solutions and to be its trusted advisor for the key value drivers in BPO: location strategy, process optimization and technology.

The Intelligent Automation Team develops novel services in the domain of back office and front office automation for a variety of industries, e.g. banking or insurance. In our projects, we use technologies such as Artificial Intelligence or Robotic Process Automation. We are a young and interdisciplinary team, ready to make innovation happen.

## **What we offer:**

We offer a 3-month internship to develop a GUI for manual labeling of email data. The GUI will be used to read email texts and classify them to defined categories. Therefore, we offer you:

- Freedom to plan and execute the project
- Responsibility over the project
- Insights to AI & RPA projects

## **What we are we looking for:**

- You have an independent work ethic
- You are hungry to learn more about innovation and process automation
- You are used to work with timelines
- You have experience with front end development

## **Your qualifications:**

- Computer Science student at University of Zürich (min. 4 semester completed)
- Savvy in coding (Java/Python)
- Native in German, professional language skills in English
